

VERSAPPLY™ SERIES

Print-Apply Labeling Systems

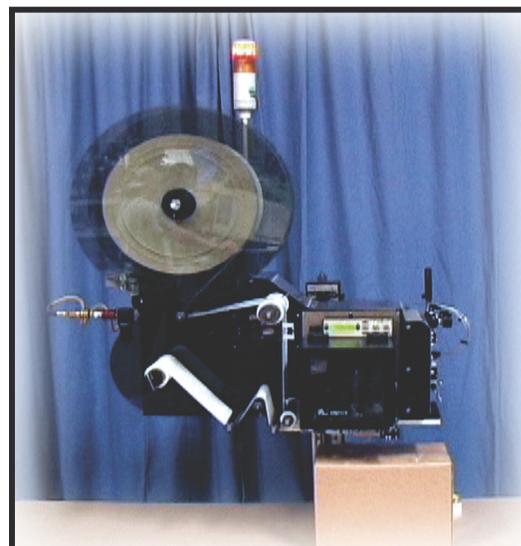

The **VERSAPPLY™ 9284 Series** of Print-Apply Labeling Systems are another set of cutting-edge product identification solutions from **code-in-motion**.

For more than 25 years, **Versapply™** Labeling Equipment has been the industry standard for **Innovation, Quality and Reliability**. The first **VERSAPPLY™** Design Team created a trend sending adaptation of Thermal-Transfer and Direct-Thermo applications for the Packaging Industry. Starting with the most innovative printer of its time, the **FARGO** table top thermal-transfer printer, subsequent **VERSAPPLY™** print-apply designs progressed to include first generations of various Print Engines including early developments from **SATO**, followed by the introduction of **Zebra PAX** and **Datamax** Print Engines. These achievements have evolved through an intimate Research & Development relationship with print engine manufacturers.

By combining lessons learned from a multitude of global implementations, regular customer feedback and continuous **Versapply™** design enhancements, the ultimate dedicated and on-demand print-apply solution has been achieved. **Versapply™ Print-Apply Labeling Systems** are the most compact, trusted and advanced print-apply labeling solution on the market today; the ideal union between accuracy, reliability and efficient label application.

Coupled with the most innovative and industry-proven application modules, **code-in-motion** offers print and apply abilities across a variety of industries; labeling small medical and electrical components as well as corrugated cartons, stacked pallets and virtually any product in between.

What differentiates **Versapply™** systems from others are the various advanced technologies brought together into a seamless, high-performance solution.

Each Print-Apply Labeling System can be configured with specific components, creating the perfect product identification solution for each individual customer:

Highlights, Features and Options:

- Size** - Perhaps the most compact Print-Apply Labeling System on the market.
- Quality** - All systems are configured with Anodized Aluminum and Stainless Steel manufactured components, and the highest quality purchased devices.
- Print Engine** - Engines from all the leading printer manufacturers (Zebra, Sato, Datamax...)
- Right or Left Hand** - Systems designed for interchangeability; "Never get stuck with obsolete and unusable equipment".
- Width** - Accommodates up to 7" label width.
- Unwind-Rewind** - Oversized, Powered and Un-powered unwind and rewind options.
- Control System and Interface** - Easy, adaptable and upgradeable, without proprietary components. "Don't be locked into a single supplier".

APPLICABLE
END EFFECTORS:

PATENTED
"TOUCH & GO"

WIPE-ON

TAMP

TAMP-BLOW

AIR-BLOW

FREE-AIR-VAC

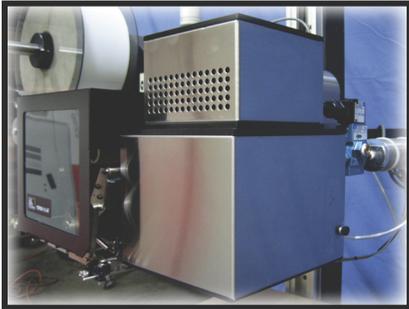

GIMBAL-TAMP

VARIABLE
STROKE

SWING-TAMP

Print-Apply Labeling Systems

□ End Effectors:

Available in various standard offerings to very **UNIQUE code-in-motion EXCLUSIVE** application methods:

- **Wipe-ON**
- **Tamp**
- **Tamp-Blow**
- **Air-Blow**
- **Free-Air-Vacuum**
- **Gimbal-Tamp**
- **Swing-Tamp**
- **"Touch & Go" Patented Technology**

Provides an ideal environment for unrestricted speed matching between the passing product and label to be applied. As a by-product, this exclusive technique allows **code-in-motion** to offer the additional ability to inspect printed information via a Vision System or barcode scanners in a first-out condition...not available from any other equipment manufacturer.

Basic Technical Specifications

Overall Dimensions:

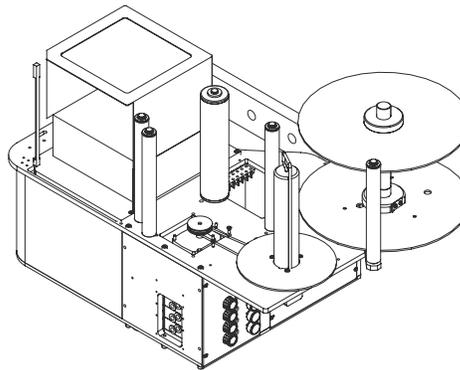

Length = 30"
Width = 18"
Height = 20"
Weight = 120 lbs.

Electrical (std):

120 VAC - 5Amp - 1ph

Air (std):

3CFM @ 120PSI

Comprehensive System Manuals describe in detail system operations and features through step-by-step descriptive text coupled with screen shots, photographs and process flows. This high quality, easy-to-use documentation serves operators, maintenance and engineering, and also greatly aids the writing of customer specific procedures.

Versapply™ Print-Apply Labeling Systems are a capable and affordable solution for organizations looking for process improvements and increased productivity. These systems, as well as all other products and services by **code-in-motion** are backed by the legendary **code-in-motion** level of quality, reliability and exceptional customer service and support; providing an excellent return on investment for companies of all sizes.
